

KANSAS WINS BY TWO TO ONE

Jayhawkers Make Double the Touchdowns Scored by Nebraska.

SAD DEFEAT FOR SCARLET AND CREAM

Desperate Work in the Last Few Moments of a Hard Game Saves the Lincoln Team from a Shut Out.

LINCOLN, Nov. 16.—(Special Telegram)—Kansas is on top, and the cry tonight is "Rock, Chalk Jayhawk, K U Oh, My O."

The score is 8 to 4 in favor of the Jayhawkers from Lawrence.

Two touchdowns to Nebraska's one tell the story, and the heart of Lincoln is bowed down.

It was ideal weather for foot ball, Lincoln people could easily understand the wonderful interest which is taken in this game among the people of the east, who witness the autumnal contests between the scientific giants of Yale, Cornell, Pennsylvania, Harvard and Princeton.

Chicago Defeats Northwestern. CHICAGO, Nov. 16.—The game between the Stevens Northwestern university and Chicago Northwestern was won by the latter by a score of 6 to 0.

Foot Ball Bulletin. WEST POINT, N. Y., Nov. 16.—West Point college football team defeated the Harvard freshman team by a score of 12 to 0.

Football Bulletin. WEST POINT, N. Y., Nov. 16.—Syracuse university won the New York state intercollegiate football association championship by defeating Rochester university by 30 to 0.

Football Bulletin. WEST POINT, N. Y., Nov. 16.—In the game between the University of Michigan and Dartmouth, the latter wins by a score of 10 to 0.

THE FIELD OF ELECTRICITY

Instructive Facts About the Electric Plow in Use in Germany.

HOW IT WORKS AND ITS COST

Development of Electricity as a Medium for Traction—Domestic Conveniences and Luxuries.

United States Consul Otto Doederlein, at Leipzig, Germany, has made a report to the department of agriculture of the electric plow which is coming into use to some extent in that country.

First, a steam traction engine, or "locomobile," to furnish power to the dynamo which is used to generate the electric current to the plow, which is attached to the plow, making the third piece of machinery.

Second, a motor, which is used to drive the plow, and is attached to the plow, making the second piece of machinery.

Third, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Fourth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Fifth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Sixth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Seventh, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Eighth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Ninth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Tenth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Eleventh, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twelfth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Thirteenth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Fourteenth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Fifteenth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Sixteenth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Seventeenth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Eighteenth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Nineteenth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twentieth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twenty-first, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twenty-second, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twenty-third, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twenty-fourth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twenty-fifth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twenty-sixth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twenty-seventh, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twenty-eighth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Twenty-ninth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Thirtieth, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Thirty-first, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

Thirty-second, a plow, which is used to plow the field, and is attached to the motor, making the first piece of machinery.

which has outlined the following scheme: "In consideration of the justness of allowing the public to use the telephone service, and in order to place all holders of public telephones on a common basis, the telephone company has also agreed that upon the adoption of the proposed plan the policy of requiring that all public telephones shall be of the automatic kind. The plan proposed is that subscribers are to guarantee \$7.20 per quarter within the flat rate district. Toll in excess of \$7.20 and not exceeding \$50 per quarter is to be guaranteed by the company. Toll in excess of \$50 per quarter is to be divided equally between the subscriber and the company. In mileage districts proportions are to be determined and divided as above indicated. The strongest objections to the plan are those which come from the physicians, who are opposed to it as one man, as they have heretofore been allowed the free use of drug store telephones. Some of the objections are: The plan will be injured by establishing an automatic pay service. They say that the telephone is one of the most convenient and useful of all inventions, and it will not be likely to buy anything else."

Gasoline engines are now being much used in Mexico in conjunction with small dynamos for the generation of electric currents for lighting and power plants. The manufacturer of the first gasoline engine in the City of Mexico, which was before President Diaz had given the green light to the evolution of the automobile, they say they would go out of the business, and took care that they did, tells of a queer taste of the automobile. The matter was a day or two after its arrival. The engine had been started, and after he had carefully examined the Mexican engineer in the handling of it, he was told that there was a terrific explosion, and as the piston had left the cylinder head the charges were shot out through the top of the cylinder. The matter was explained satisfactorily to the captain, but the disappointment of the soldiers could only be assuaged by drinks all around. The engineer says that the explosion was nothing to what he felt next day when he was presented with the bill for power.

NOVEL USE OF A SEARCHLIGHT. A novel use has been found for the electric searchlight in connection with a strike in the city of Manchester. The manufacturer who has been struck was determined to keep his mill going, and he promptly secured new hands and set them to work. The searchlight was used to find the strikers from maliciously setting fire to the temporary sheds erected for the protection of the new hands. An hour after the searchlight was used, the strikers were on the top of the works, and during the continuance of the strike it was used in conjunction with the police force, established in the works, to scour the surrounding country and to illuminate the various parts of the works. It was found so effective that a large number of temporary police were dispensed with.

A TELEPHONE WAR. A big telephone war is on in Milwaukee, Wis. A circular letter was sent to the heads of the leading business firms in the city asking them to attend a meeting for the purpose of arranging for concerted action among users of telephones against the exorbitant charges by the Wisconsin Telephone company. The letter was signed by J. Frank Hoar, president of the Wisconsin Telephone company. The letter was signed by J. Frank Hoar, president of the Wisconsin Telephone company. The letter was signed by J. Frank Hoar, president of the Wisconsin Telephone company.

Several weeks have been given to the study of the methods of the Wisconsin Telephone company, by which the calls of each telephone subscriber are limited to three days, or 1,000 a year, and against a charge of 2 cents for each call. The company recently lowered the price of telephones from \$90 to \$75 a year, but now charges for each call in excess of 1,000 a year, and the calls are limited to three days, or 1,000 a year, and against a charge of 2 cents for each call.

MADE MONEY IN SOUTH AFRICA. Ex-President Harrison Said to Have Made a Good Investment. ST. LOUIS, Nov. 15.—Benjamin Harrison, citizen of Indiana, is said to have caught the South African mining fever, and a \$500,000 investment realized \$100,000 or more for him. This interesting information was gleaned this afternoon from H. Sherard of Helena, Mont., who has just returned from South Africa, and is en route to New York. Two years ago a syndicate of investors, including Harrison and John C. Wright of the Chase National bank of New York, sent him to the gold fields of the Transvaal to examine the situation. He returned with a report that the investment realized \$100,000 or more for him. This interesting information was gleaned this afternoon from H. Sherard of Helena, Mont., who has just returned from South Africa, and is en route to New York. Two years ago a syndicate of investors, including Harrison and John C. Wright of the Chase National bank of New York, sent him to the gold fields of the Transvaal to examine the situation. He returned with a report that the investment realized \$100,000 or more for him.

Good Crowd at the Fair Grounds. ST. LOUIS, Nov. 16.—A fairly good crowd turned out to the fair grounds this afternoon, despite the fact that Fred Foster's crowd is across the street. Track slow and weather cool. One favorite and four second choices won today. Harry Clark received a letter from the first. Summaries: First race, three-quarters of a mile; King Elm won, Legion second, Fred Foster third. Time: 1:27. Second race, five-eighths of a mile; May Ashley won, Bandala second, Legion third. Time: 1:19. Third race, handicap, one mile; Logan won, London second, Haroldine third. Time: 1:57. Fourth race, five-eighths of a mile; Swift won, Legion second, Miss Rowett third. Time: 1:38.

Lotus Club Entertains Evening. NEW YORK, Nov. 16.—The Lotus club gave its third reception to Sir Henry Irving tonight. The first reception was given twelve years ago, when Mr. Irving made his debut in the city. The decorations for tonight were elaborate, and the dinner was the largest ever given by the club. At midnight the guests were seated for the first time. Frank R. Lawrence presided, and Sir Henry Irving was seated to the left of General Horatio Porter. After the supper came to an end in the very best of spirits, and the guests were seated at the club, on behalf of a few of the members, presented a beautiful and original gift to the actor by the club. The flow of oratory and wit began with the presentation of the gift.

Singer Failed to Break the Record. DENVER, Nov. 16.—W. C. Carger today attempted to break Hamilton's world's record of 2:02.5 for unpaired mile, but only succeeded in making 2:03.5. Carger could not have done a better day, and he left in the best of condition. He rode a wheel geared to 2:02.5. Harry Clark received a letter today saying that Hamilton's record had been broken, as well as Clark's class A mile in 2:06.1-2.

Van Heel Challenges Dixon. KANSAS CITY, Nov. 16.—John Van Heel, the bantam fighter, today signed articles to fight Tommy Dixon for a purse of \$500 a side, at 122 pounds, and deposited \$100 as a guarantee. The fight will be held within five weeks after the challenge is accepted. The mill will probably occur on the 22nd inst.

Druggists Being Greatly Exercised Over the Question of Free Telephone Service in Drug Stores. A free telephone service in drug stores is being greatly exercised over by the druggists. It is believed that the druggists are opposed to it as one man, as they have heretofore been allowed the free use of drug store telephones. Some of the objections are: The plan will be injured by establishing an automatic pay service. They say that the telephone is one of the most convenient and useful of all inventions, and it will not be likely to buy anything else."

WHERE NERVE IS NEEDED

Catching Swordfish a Risky but Fascinating Sport.

THE OCCUPATION OF OLD WHALERS

Scenes on the Massachusetts Coast Where the Marine Murderers Are Hooked-Skill and Courage Required.

Swordfishing is getting to be a risky business, almost as dangerous as the vocation of a freight brakeman. The modern swordfisherman, says the Boston Herald, is a whaleman in all purposes, and a "brave" swordfish is just as dangerous as an ugly whale. The former has the very essence of devilry bottled up in his slippery black body. He swings his horn sword with such vengeance that it is as wicked a weapon to face as a blade of heavy steel. He doesn't jab, but slashes with a twisting, sawing motion, like a cut of a scythe. In a 200-pound fish the sword is about three feet long, parallel to the surface of the water on its flat side. It is not sharp at the point, nor are the edges keen. Rather the contrary. This sword appears to be furnished with thousands of sharp projections, like saw teeth, almost invisible to the eye.

The swordfish has a head somewhat like that of a shark, and its mouth is nearly as uncanny. The sharp, hooked teeth are wanting, yet the swordfish's big eye and gaping food-popper, surmounted by the wicked sword, make a combination very unpleasant to run up against.
